## Introduction

VHFP-30 supports AMD Ryzen™ 5 3500U (quad-core) and provides a complete PC platform with high performance. Coming from the mobile processor family, this CPU combine the incredible performance of the pioneering “Zen” architecture and “Vega” GPU in a single chip with thermal design power (TDP) as low as 15W. This PC is equipped with two DDR4 SO-DIMM slots with a total maximum capacity of 32GB to add higher bandwidth and lower latencies for processes. And it also features 3×M.2 that support Wi-Fi, 4G module and NVMe SSD.

Two independent monitors are supported via the DP and HDMI2.0 ports. It also has rich interfaces including 4×USB2.0, 2×USB3.0, 1×COM, 1×Mic-in, 1×Line-out, 2×LAN, and 1x Type-C slot, catering to most requirements in the market. This AMD Ryzen™ system is an ideal integrated platform for various application as, but not limited to, automation, network security, communication and transportation.
